Insightness of youth towards marriage

YD Haritha and Dr. Uma Devi

Abstract

The present study makes an attempt to understand the Insightness of youth towards marriage. The results revealed that values towards marriage in general have not changed much among the youth. They are still in agreement with the conventional values.

Keywords: Insightness, youth, marriage

Introduction

Marriage is a legally recognized union between a man and a woman in which they are united sexually; cooperate economically, and may have children through birth or adoption (Strong, DeVault, & Sayad, 1998) [3].

Throughout the literature reviews, early marriage is either one or both of the married couple being under the age of 18 years old or in high school (Hutchinson & McNall, 1994, Lindsay, 1985, Walker-Moffat, 1995) [4].

Marriage or living with a partner brings many changes into an adolescent's life such as communication, arguments, and financial issues (Lindsey, 1985).

Research method

It focused on youth (15 to 29 years). The main focus of the study was to study Insightness of youth towards marriage.

Research findings and Discussion

The data collected with respect to understand the Insightness of youth towards marriage. The results revealed that youth expressed 98 percent of marriage should be decided by the elders, 93 percent in selection of marriage partner should be left to the boys/girls, 97 percent in choosing the marriage partner preference should be to nuclear family set up, 42 percent of marriage should involve match makes of Matrimonial bureau, 95 percent of marriage should be celebrated without much delay after engagement, 92 percent expressed one should be allowed to marry any person of his/her liking, 95 percent of marriage is for social status, 97 percent of marriage should provide opportunity for partners in decision making process.
